UEC sent Sam another proposal. You will see that they ask for exemption for the B/C/D sands across the site and have added a northern purple line to identify A Sand on the north side.

Sam asked to meet at 2 pm today so please look over this new information on 13th RA conf room. Let's chat at 1:30 in my office.

Sam, I will call you in a few minutes to present an idea that I hope you will agree will get the A Sand back in play..

In the meantime, attached are three files. The first (Gradients.xlsx) is a spreadsheet depicting the directionality of "regional" water (Outside of the graben), and direction of water flow inside the graben. Sand A Piezonmetric.pdf is a illustration of the data. And finally, A revised, revised Aquifer Exemption that places the Church wells nearly 4,000 ft away..

Talk to you soon.
